

# COLOUR vision n°18

# COLOUR VISION EDITION °18

The COLOUR VISION series is a creative source of inspiration for the world of plastics.  
This 18th edition of the COLOUR VISION series is dedicated to two trend themes:

Trend experts are constantly researching changes in society and the associated trends in colour. We define our colour concepts based on our observations. Our colorists collaborate with experienced trend scouts to identify what best reflects the spirit of the times.

The result is showcased in our COLOUR VISION series, a collection of 18 plastic illustrations, which present innovative colours, effects and surfaces in selected polymers.
